

AURASMA

AUGMENT THE WORLD AROUND YOU

LAKE ORION COMMUNITY SCHOOLS
DAKOTAH COOPER

When Aurasma opens it looks like a camera. From here you can "scan" objects you have already augmented.

To augment a new object (or "create an aura")
Click the "A"

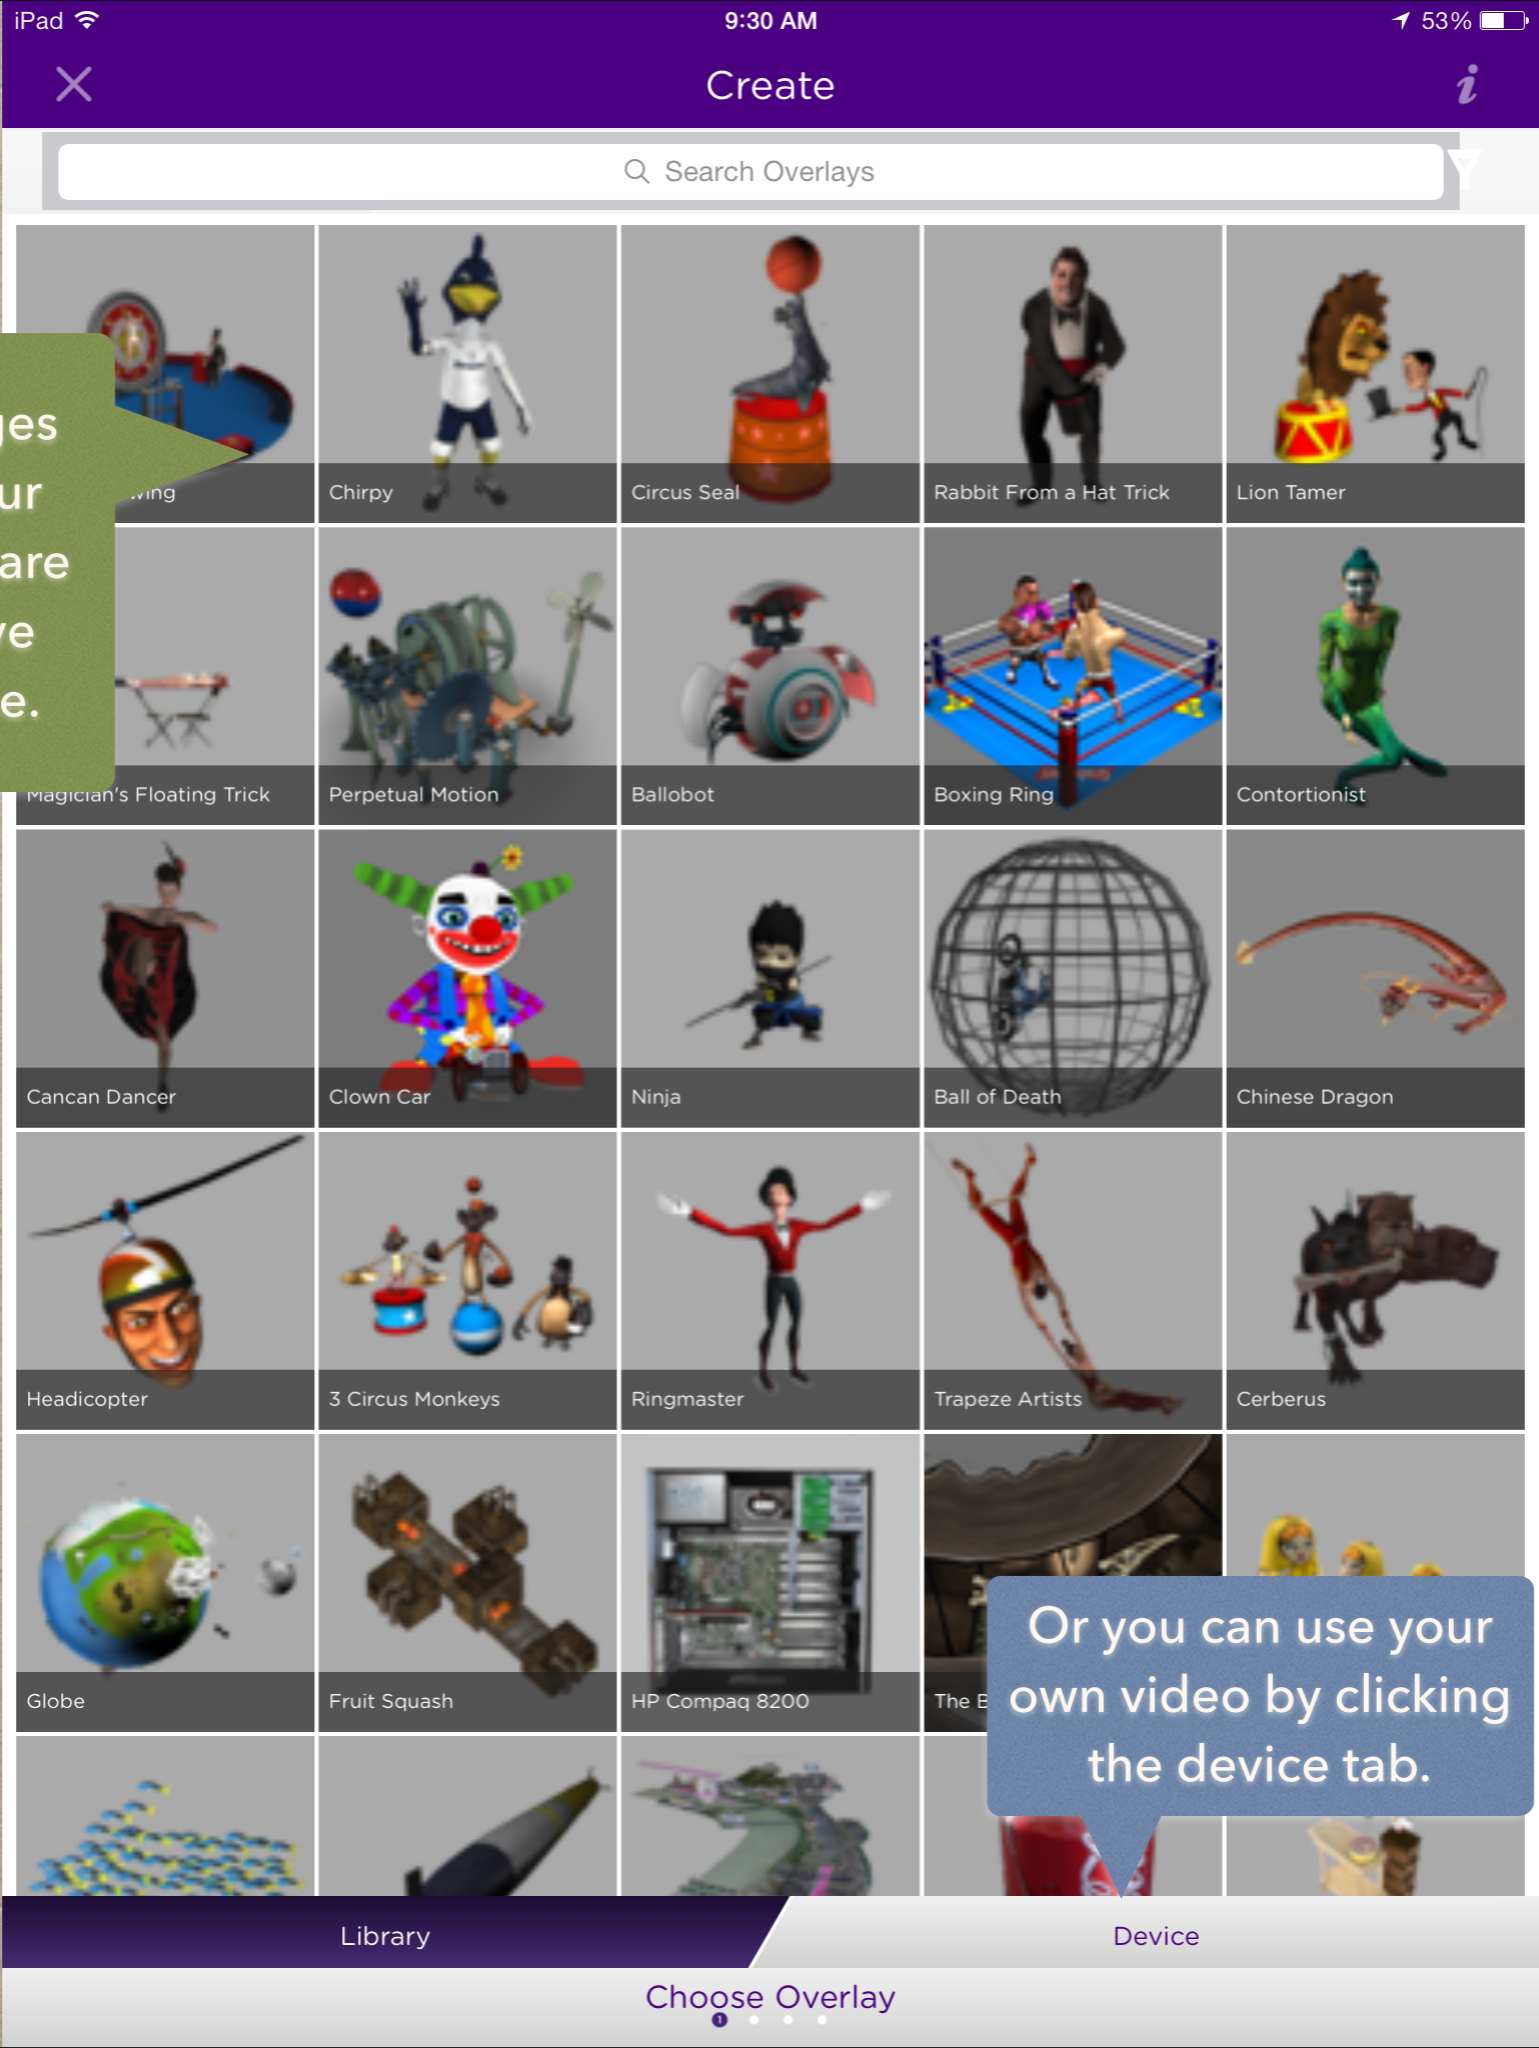

These are auras that already exist in the world. If you scanned any of these objects with your app they would animate.

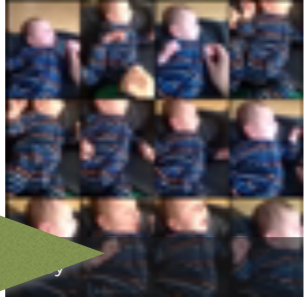

This tab will take you to auras that you have seen before.

To create a new aura press the + button

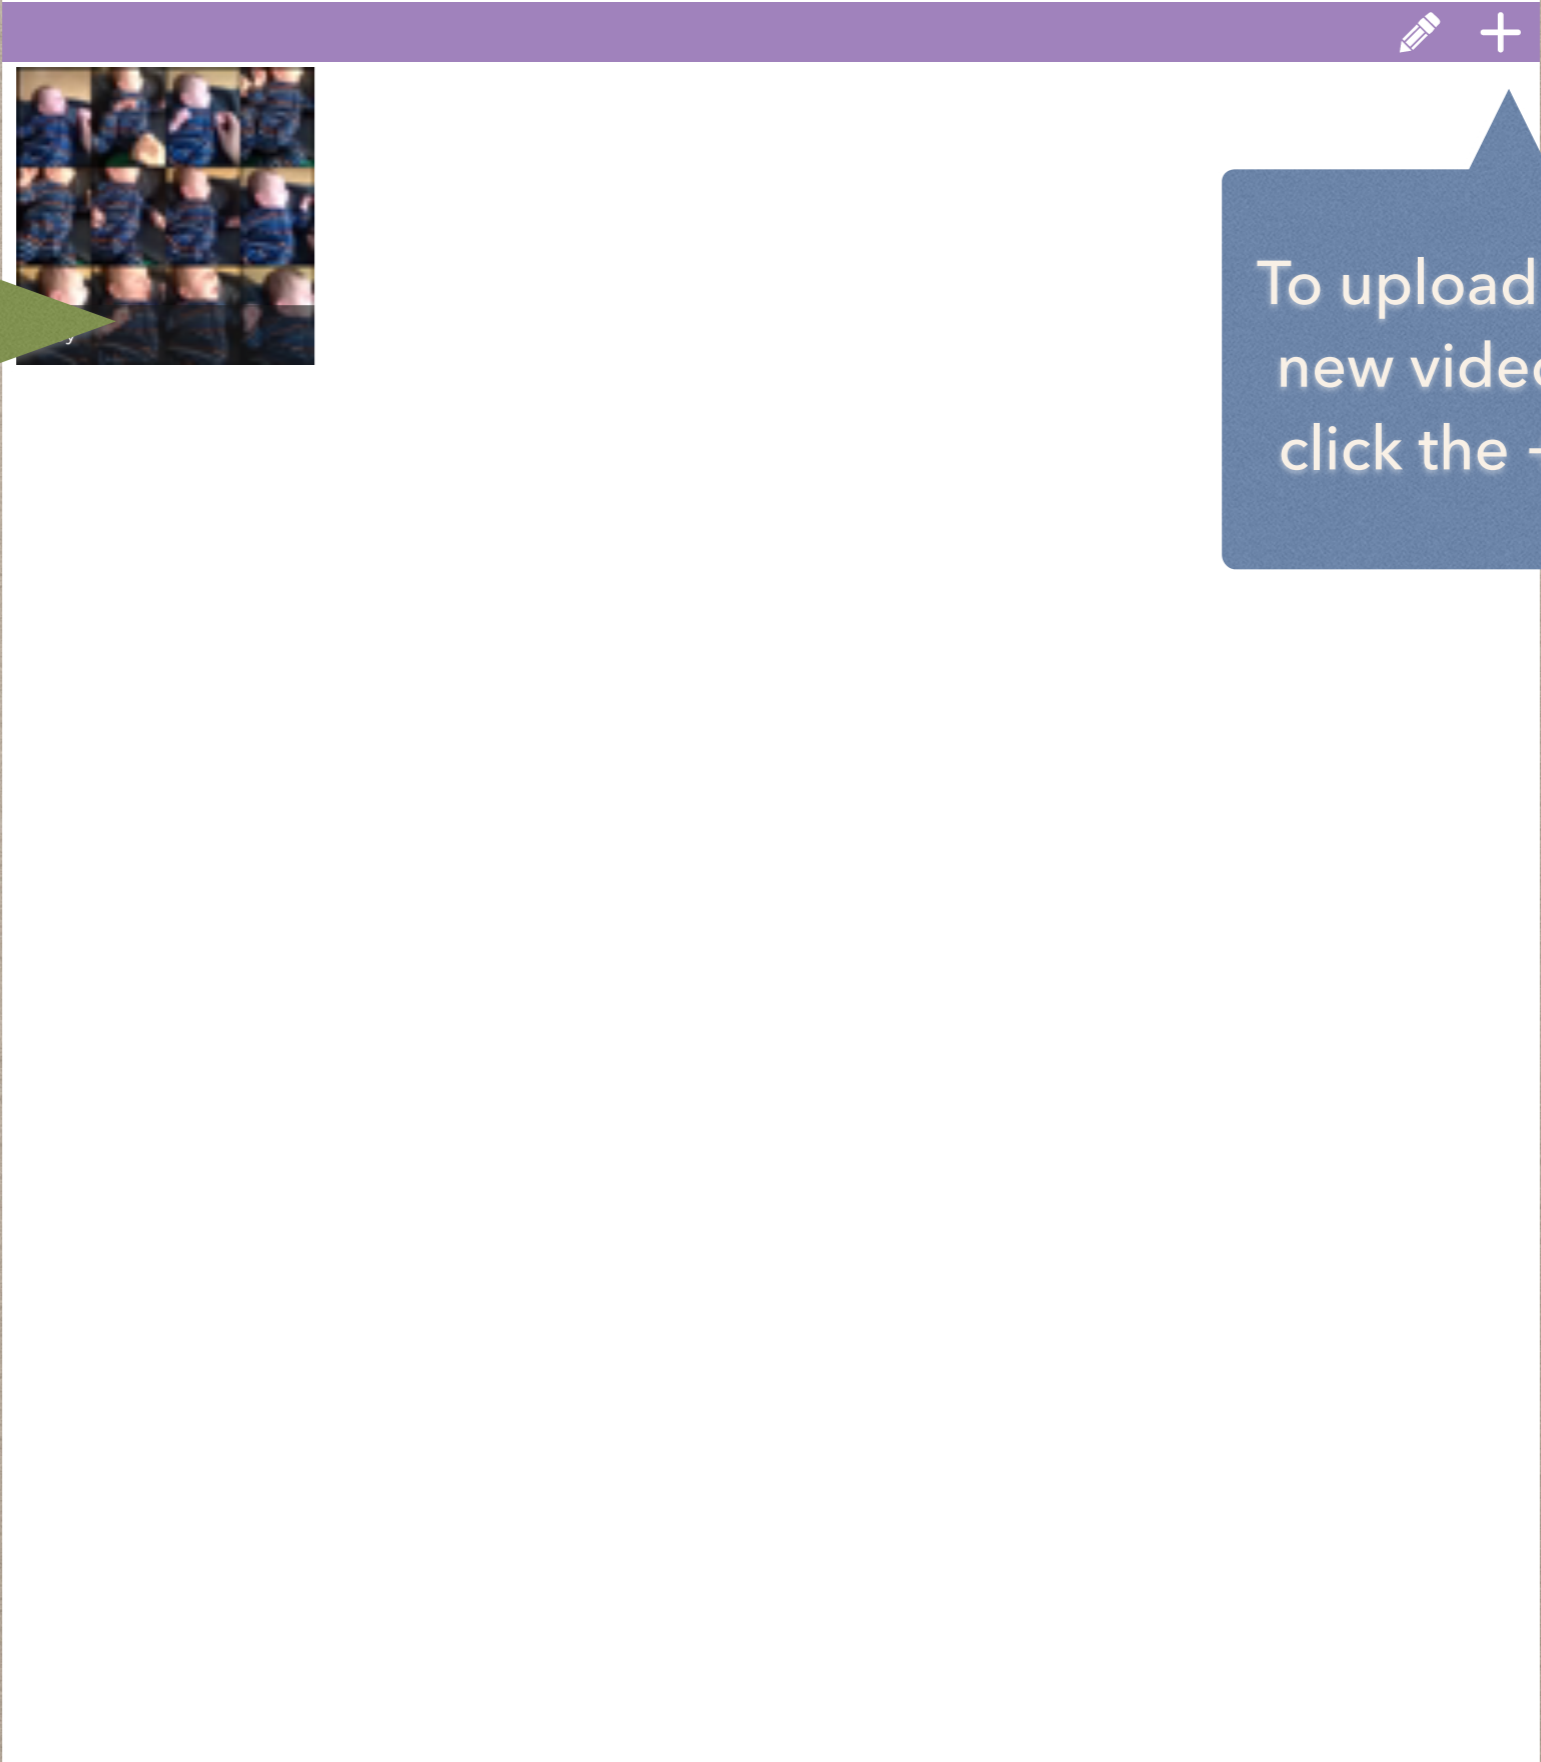

Overlays are 3D images that will "overlay" your trigger image. These are images that they have created for you to use.

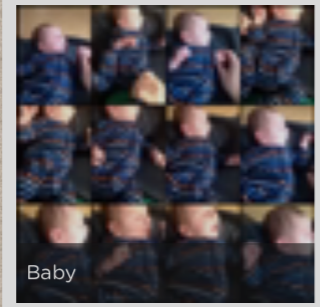

Or you can use your own video by clicking the device tab.

Here are all of the videos that you have uploaded so far.

To upload a new video click the +

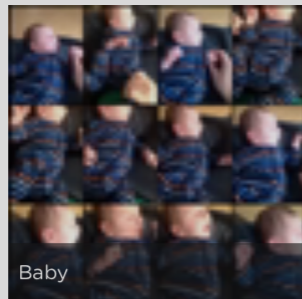

If you want to take the video now click Camera

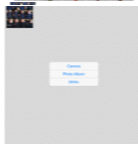

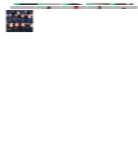

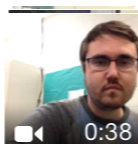

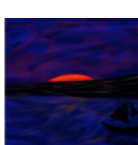

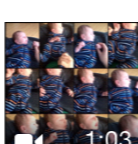

- Camera
- Photo Album
- blinkx

If you've already taken the video click Photo Album

1:03

Select your video

← Baby Choose Video Use

Click use

The video will upload. Here is the status bar.

Library

Device

Choose Overlay

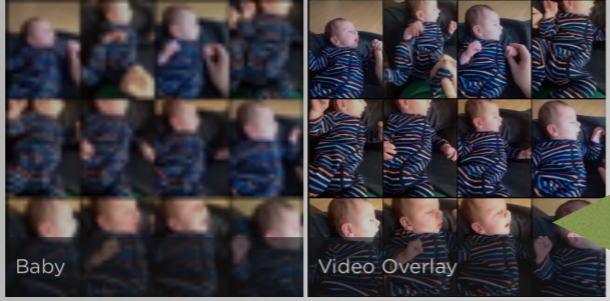

Create Overlay

Name (optional)

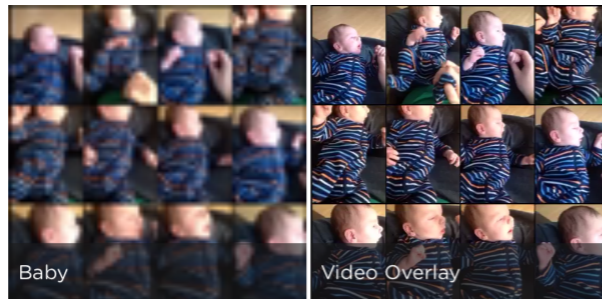

Finish >

Name your
video

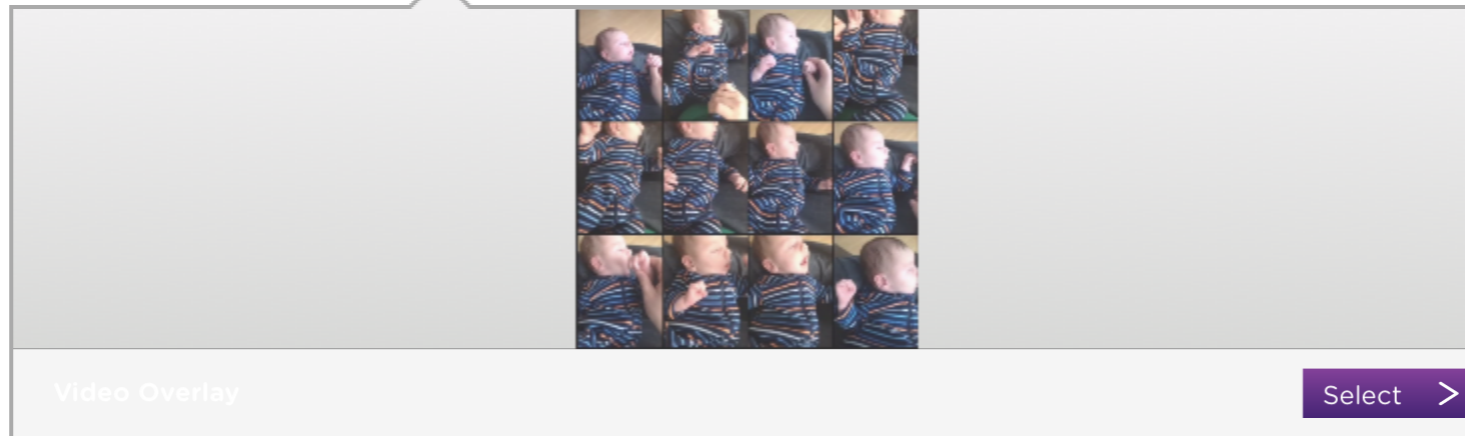

Touch the video you would like to use as an overlay

Baby

Video Overlay

Video Overlay

Select >

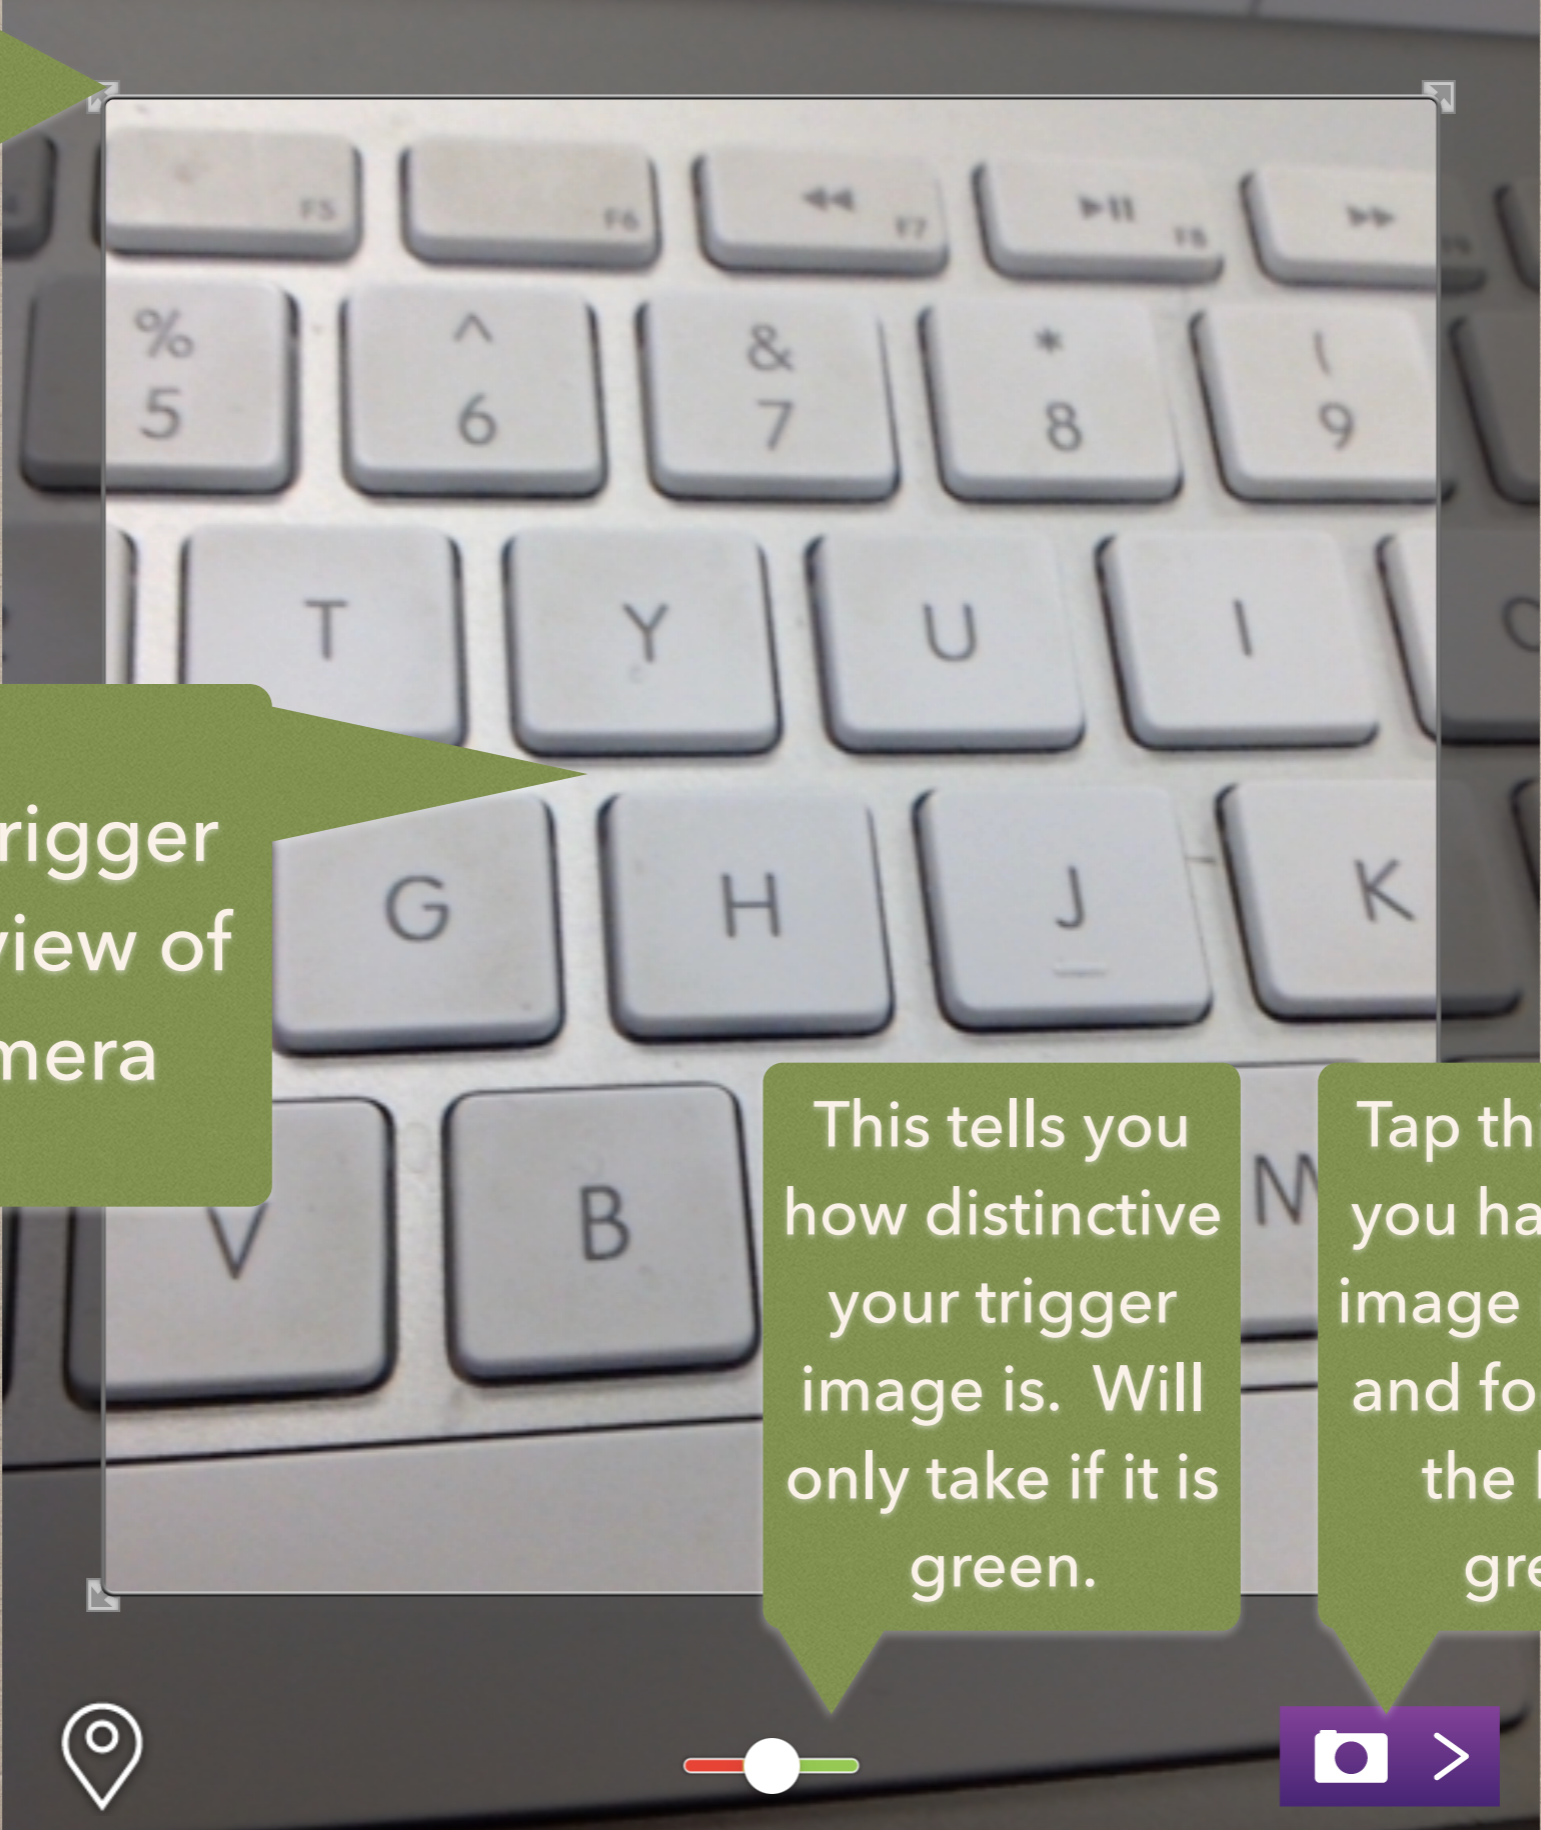

Press Select

You can adjust the view area bigger or smaller if you need to.

Put your trigger image in view of your camera

This tells you how distinctive your trigger image is. Will only take if it is green.

Tap this when you have your image in frame and focus and the bar is green.

Your video will play. To move on press the arrow

Type in a name for your aura - I usually use the same name as the video I uploaded

If you set the video on private you will have to sign into your aurasma account on each device you want to view the auras

Public will allow people to follow you and view any auras that you make public.

Press finish when done.

Name

Private Public

Add to a Channel? NO

Finish >

Add details

Now when you hold
your aurasma
camera over your
trigger image your
overlay will come
up!

Your Aura "b" is now
available on your phone
